

# Results you can depend on.

## Neonode® zForce® touch interaction gives you total control—even when you're wearing gloves.

Innovative packaging techniques are required in order to meet the size, weight, and power (SWaP) reduction requirements of the Military and aerospace industry without sacrificing reliability or performance.

zForce adds versatility and performance to your equipment by including the economical zForce optical sensing technology to any display or surface—even in the most demanding environments.

Don't settle for ordinary touch controls or display panels when you can design in a reliable, rugged and economical zForce into your next product today!

- **Compact:** Small module size and mounting options eliminate bulky touch frames/black-off areas on touch glass for maximum display area usage.
- **Lightweight:** 6 gram (72mm length) touch system weight, works with plastic display protection film to eliminate the need for heavy touch glass.
- **Low-Power:** zForce enables lower system power consumption as there is no need to compensate for display light loss caused by touch glass.
- **Light Resistant & Temperature Robustness:** works in hot or cold temperatures and in any environment with intense or glaring light without any aging effect.
- **No EMI:** reliable interaction without EMI issues in sensitive environments.

Contact your regional Neonode Sales Representative to design zForce into your next application.
