

No Down Time.

8

Adding zForce® to elevator control panels ensures consistent and uninterrupted operation.

Add versatility and performance to your displays by including zForce optical sensing technology to any surface—even in the most demanding environment.

Use zForce as a replacement for buttons on your elevator control panels or save in service calls and ensure reliability by using zForce as a redundant system in the event of mechanical failure.

- zForce is ideal for Touch, Touchless, or Mid-air applications.
- Works with any input including long nails, gloves or dirty hands
- Functions in environments with intense or glaring light without aging effect
- Offers reliable interaction with no EMI issues in sensitive environments
- Operates in hot or cold temperatures without degradation
- Lightweight modules work with plastic display protection film, eliminating heavy touch glass.

Over 68 million consumer products and 4 million cars have used Neonode's Optical Sensor Technology. Contact your Neonode Sales Representative today.
